

PPN3-R Night Vision Sight

An upgraded night vision sight which utilizes modern image intensifiers and provides high quality of image.

PPN3-R can be used with any weapon equipped with the MIL STD-1913/STANAG4694 mounting. With additional adapter can be attached to weapon with side AK style mount.

Elevation and windage corrections are made via finger-adjustable knurled dials, which are very easy replaceable. The sight is recommended for long distance.
