

Acid and Lye Resistant Clothing

BLOUSE TYPE B

BLOUSE TYPE A

BLOUSE TYPE A – fastened in front by zip covered by two protective tabs, with hood and ventilating hole on the back.

BLOUSE TYPE B – dressed on over the head, with rubber seal round the face and elastic round loins at the bottom.

The trousers are permanently joined with the acid and lye resistant boots – they have rised front and adjustable braces fastened with clasps.

The clothing is designed for work in chemically aggressive environment, for users who are exposed to action of acids and lyes. The clothing can be use as the protection against getting wet, as well as in contact with sauline solutions and liquid industrial wastes with acid or alkaline reaction.
