

## ZIG-T-1 Thermal Day Vision Camera

**Thermal Day Vision Camera** is designed for observation and aim in day and night conditions, as well as in fog and smoke.

**ZIG-T-1** has diode rangefinder. Camera contains uncooled bolometric detector with sensitivity  $NEDT < 100\text{mK}$  and gives the possibility to locate sources of warmth, search for people and to observe the terrain in strong smoke and fog conditions.

Camera can be used mainly in observational and sight systems.

Control of the camera and choice of display options can be done from external desktop.
